## Attention!

The best way to prevent the spread of illness is to stay home, and not travel, if you are not feeling well.

**We have multiple protocols in place to keep you healthy and safe, and get you moving!**

1

### Face Masks

The CDC suggests that everyone should wear a mask in public settings and especially when other social distancing measures are challenging to maintain.

2

### Sanitation / Disinfecting

The PermaSafe System is comprised of two distinct, yet equally remarkable, patented, and EPA registered products.

- Kills 99.999% of harmful bacteria and viruses
- EPA Reg 87583-3

**Step 1. PermaSafe CLEAN** - High-performance, broad-spectrum hospital-grade disinfectant.

**Step 2. PermaSafe SHIELD** - Long-lasting antimicrobial surface protectant that continuously inhibits the growth and spread of microorganisms and helps prevent bacteria's growth and spread.

3

### Custom Plexi Divider

Our workhorse Cadillac Escalade, lovingly known as "Da Beast," is outfitted with a custom 1/4 inch cast acrylic protective barrier between the driver and your passenger compartment.

4

### Clean/Fresh Air

- HEPA cabin air filter removes 99.9% of airborne particles.
- Partially-retracted passenger windows with custom side deflectors
